

# Scopulariopsis

## **Effect On Human Health:**

- Skin Infections
- Lung Infections
- Bone Infections
- Nose Infections
- Mouth Infections

## **Symptoms Include:**

- Coughing
- Ulcers in the mouth and nose
- Weakness

## **Method of Transmission:**

- Airborne

## **Clinical Information**

- This mold loves moist areas and attacks a wide variety of body systems. Because of its special love for moisture and heat, the lungs are very vulnerable to this mold. It has also been linked to a wide range of skin infections. If it gets into the blood stream the toxins of Scopulariopsis will settle in bones, which will require long and painful therapy.
